and

*van Laarhoven AI, Ulrich DJ, Wilder-Smith OH, van Loey NE, Nieuwenhuis M, van der Wee NJ, Evers AW*. Psycho-physiological Processing of Itch in Patients with Chronic Post-burn Itch: An Exploratory study. *Acta Derm Venereol*. 2016; 96: 613–618, unfortunately, the authors discovered that the original version of this article contained an error:

Due to an error in the preparation protocol of the pharmacy, the concentration of histamine applied to the participants in the studies described in both publications was 0.6% histamine (as diphosphate monohydrate) instead of the 0.3% histamine (as diphosphate monohydrate) as written in the publications.
