Editors' Choices of the month:

[Remote rehabilitation for patients with Covid-19](#)

Tomoko Sakai, Chisato Hoshino, Reiko Yamaguchi, Masanobu Hirao, Rui Nakahara, Atsushi Okawa

Comments by the authors: We performed this trial of remote rehabilitation to a COVID-19 patient because we were very sorry that we could not deliver the usual rehabilitation to COVID-19 patients, to avoid infection transmission. Thus, we installed Wi-Fi-connected iPad terminals in the infected zone (red area) as well as in the clean zone (green area), for communication between a physical therapist in the clean nurses' station and a patient in the patient's room in the COVID-19 general wards. We investigated remote rehabilitation performed for patients in the red area by the physical therapist in the green area using an iPad for audio and video... [Read more](#)

Further highlights of this month in JRM:

Post-stroke health-related quality of life at 3 and 12 months and predictors of change in a Danish and Arctic Norwegian Region. [Read more](#)
